ODISHA AGRICULTURE STATISTICS -2010-11

Introduction:

Growth of the Agricultural Sector is important not only for ensuing food security and reduction of poverty in rural areas, but also sustaining growth of rest of the economy. More so, growth of two non-farm sectors viz. Secondary & tertiary sectors, can be sustained only when the agricultural sector continues to grow and provide adequate demand for goods & services along with market for the farm produce.

In the state of Odisha, this sector has an impressive long-term record of taking the state out of serious food shortages despite rapid growth of population. This can be construed to have been achieved through a favourable interplay of infrastructure, technology, extension, policy support with strong and meaningful political will.

Though agriculture and ancillary sector contributes less than 20% towards the Gross Domestic Product of the state, still it sustains and directly or indirectly provides employment to 70% of total working force of the State. Due to occurrence of frequent natural calamities, there is wide annual variation in growth. In spite of that, Agriculture contributed 17.59% to Odisha's GSDP during 2010-11 while the corresponding contribution to National GDP by this sector was only 14.19%. The agriculture sector has grown, in real term at 2004-05 prices, at an average annual rate of 4.12% per annum in the first four years of the 11th five year plan.

Odisha has a geographical area of 1,55,707 sq.Kms. and is divided into ten agro climatic zones depending upon the soil types, topography, rainfall and cropping pattern. The total cultivated land of the state is 61.80 lakh ha out of which 29.14 lakh ha (47%) is High land 17.55 lakh ha (28%) Medium land and 15.11 lakh ha (25%) low land and about 35% of cultivated land is irrigated. Majority of the farmers are small and marginal and have limited purchasing power

with low levels of literacy. The number of operational holdings of the state is 43.56 lakh with 50.19 lakh ha of operational area as per Agricultural Census-2005-06. The state witnessed a decline in operational area from 50.81 lakh ha in 2000-01 due to urbanization and more of land put to non-agricultural use. So the average size of holding for all social groups in the state has decreased to 1.15 ha as against 0.83 ha for SC and 1.24 ha for ST category of farmers.

The Department of Agriculture is in its toes to increase the production & productivity of different crops inspite of aberrant weather conditions and limited resources. Different schemes are being implemented in the state such as National Food Security Mission (NFSM), Rashtriya Krishi Vikas Yojana (RKVY), Integrated Cereal Development Programme-Rice (ICDP-Rice), Integrated Coarse Cereal Development Programme (ICDP-Coarse Cereals(Ragi)), Sustainable Development of sugarcane based Cropping Systems (SUBACS), Agriculture Mechanisation under Work Plan, Integrated schemes of Oilseeds, Pulses, Oilpalm & Maize (ISOPOM), System of Rice Intensification (SRI), Technology Mission on Cotton, Technology Mission on Sugarcane, Jute Technology Mission(JTM), National Project on Management of Soil Health and Fertility, e-Pest Surveillance, National Horticulture Mission & etc to obtain maximum return per rupee invested in the farm land. Besides, Schemes on “Capacity building and extension reforms”, “Post harvest Management of Agri-produce” and “establishment of Commercial Agri-enterprises” are being implemented to supplement the developmental agenda.

This booklet “ODISHA AGRICULTURE STATISTICS 2010-11” contains, mainly, the estimates of Area, Productivity and Production of different crops, land utilization statistics and other useful information relating to agriculture like rainfall, temperature and humidity, irrigation, fertilizer, seed, farm mechanization, RIDF (Jalanidhi), RKBY, crop loan and also incorporate information on SRR, MSP, Sugarcane Development and Departmental farms.

The information furnished on area, yield rate and production of Paddy crop, in this booklet, has been estimated by the Directorate of Economics and Statistics (DE&S), Odisha, which is based on the sample surveys conducted under EARAS scheme. The estimates of other crops made on the basis of reports received from the field functionaries of the Directorate of Agriculture & Food Production (DA&FP), Odisha and Directorate of Horticulture (DH), Odisha, are also incorporated in the booklet.

Climate & Rainfall:

The climate of the State is tropical, characterised by high temperature, high humidity, medium to high rainfall, short & mild winter. The normal rainfall is 1451.2 mm. Most of the rainfall received in the state concentrated in a period of 3 months of the monsoon season.

During 2010, the onset of monsoon was delayed by two weeks and the rainfall received during the monsoon period was uneven and inadequate. The overall monsoon rainfall was excess by 49% (on account of un-seasonal rains received during December). The detailed rainfall for the year 2010 is indicated below.

| Period | Rainfall in mm | | % of Deviation |
|--|----------------|---------------|------------------|
| | Normal | Actual | |

Crop Condition:

The effects of scanty and erratic rainfall on Kharif crops are noted below.

- (i) Heavy weed infestation and poor plant stand in Autumn paddy.
- (ii) Late transplanting of medium and late paddy with aged seedlings.
- (iii) Drying of grains of medium and late paddy.
- (iv) Poor plant stand, reduced growth and tillering of late variety.

The condition of non paddy and rabi crops was by and large normal.

Crop Coverage:

The net area sown and gross cropped area during the year 2010-11 were 54.21 lakh ha and 90.80 lakh ha respectively. The cropping intensity was 167%. Rice is the major crop in kharif season and so are pulses & oilseeds in Rabi season. The coverage under different crops during the year 2010-11 is as follows.

(Area in lakh ha)

| Crop | Kharif | | Rabi | | Annual area | Total | |
|---------------|--------------|-----------------|--------------|-----------------|-------------|--------------|-----------------|

High Yielding Coverage:

The coverage under high yielding varieties crops grown during 2010-11 is 36.46 lakh ha. The crop-wise break up is noted below.

(Area in lakh ha.)

| Crop | Total Area covered | Coverage of High yielding | % of total coverage |

Irrigated Area:

The total irrigation potential created till 2010-11 from all sources is **45.14** lakh ha (30.36 lakh ha during Kharif and 14.78 lakh ha during Rabi). The gross irrigated area during the year was **31.06** lakh ha (20.85 lakh ha during kharif and 10.21 lakh ha during Rabi) which is 69% of the irrigation potential created. The details are presented below.

Seeds

Quality seed plays a vital role in boosting up the production. The strategy has been to maximize quality seed distribution. The details of seed distribution made through departmental sale centers during 2010-11 are as follows.

| Sl. No. | Seeds | Quantity of seeds supplied (Qtls.) | | |
|-----------------------|----------------|------------------------------------|-----------------|------------------|

Fertiliser

The use of chemical fertilizers substantially improves the productivity of crops. Due importance is being given on use of balanced fertilizers in line with the Integrated Nutrient Management (INM) Principles, which not only enhances production but also maintains the fertility of the soil. The details of fertilizer consumption made during 2010-11 are given below.

| Type of fertilizer | Consumption in '000MT. | | |
|------------------------|------------------------|---------------|---------------|
| | Kharif | Rabi | Total |
| N | 208.37 | 86.35 | 294.72 |

Pesticides

Crops are exposed to various Agro climatic sensitization to a large number of pests and diseases. Most often chemical control being resorted to protect the crops to avoid crop losses. The detail of pesticides consumption during 2010-11 as follows.

(Quantity of ai in MT)

| Sl. No | Type of pesticides | Consumption of pesticides | | |
|----------------------------------|---------------------------------------|---------------------------|--------------|---------------|
| | | Kharif | Rabi | Total |

Farm Mechanisation

Farm mechanization is inevitable in modern crop husbandry. This not only ensures timely agricultural operations but also helps reduce drudgery of labour & cost of cultivation. Massive efforts have been put in for popularization of different improved farm equipments and machineries among farmers through conducting demonstrations and extending subsidy. The achievement made in this regard during 2010-11 is presented below.

| Item | Unit | Achievement |
|-----------------------------------|-------|-------------|
| Tractor | Nos | 4750 |
| Power tiller | Nos | 12742 |
| Self propelled reaper | Nos | 869 |
| Self propelled transplanter | Nos | 42 |

| Hydraulic Trailer | Nos | 1407 |
| Pump sets | Nos | 29255 |
| Combined Harvester | Nos | 123 |
| Farm Power Consumption | KW/ha | 1.12 |

Creation of captive irrigation

Assured supply of water is one of the pre-requisites for successful crop production. Accordingly, our State Govt. provides subsidy to the cultivators for creation of captive irrigation under **RIDF (Jalanidhi)**. The achievement made under the scheme during 2010-11 is as follows.

(Unit in Nos)

| Name of the captive irrigation under RIDF | During 2010-11 |
|---|----------------|
| Shallow Tube well | 15543 |
| Bore well | 4681 |
| Surface lift | 9 |
| Dug well | 1801 |
| TOTAL | 22034 |

Agriculture Credit

Crop loan is an indispensable input, especially for small and marginal cultivators of our state to meet the rising cost of inputs for enhancing crop productivity. During the year 2010-11, an amount of **₹.5448.78** crores has been advanced to farmers as crop loan.

Crop Insurance

National Agricultural Insurance Scheme (NAIS) is being implemented in the State since Rabi-1999-2000 to insulate farming community against agriculture risks. In view of representation received from the farmers, ongoing NAIS has been reviewed to make it more farmer friendly and accordingly Modified National Crop Insurance Scheme (MNAIS) has been implemented in the State during Rabi 2010-11 on Pilot basis in five districts namely Balasore, Bhadrak, Baragarh, Subarnapur and Kalahandi to protect farmers from production risks. Similarly, Weather Based Crop Insurance Scheme (WBCIS) is being implemented during Kharif seasons since 2009 on pilot basis for Paddy crop only.

Both loanee and non-loanee farmers are covered under these schemes, but it is compulsory for loanee farmers and optional for non-loanee farmers. The crops covered are Paddy, Maize, Groundnut, Niger, Red gram, Jute, Cotton, Turmeric and Ginger during Kharif season and Paddy, Groundnut, Mustard and Potato during Rabi season. The unit area for

crop insurance was block for Paddy, Niger, Turmeric & Ginger crops and district for Maize, Groundnut, Red gram, Cotton and Jute crops. During Rabi the unit area for Crop Insurance was *Gram Panchayat* for Paddy and district/ cluster of district for Groundnut and Potato.

The achievement made under above crop insurance schemes for the year 2010-11 is given below.

Foot Note: Reasons of defunct farms:

Poonang: Sand casting

Keshpur: Inundation of saline water from Chilika

Desil: Rain shadow drought prone area with lack of irrigation facility, land without sufficient organic matter with quick soil moisture depletion.

Boipariguda: No irrigation available & 90% upland

Dumuriput: Adequate irrigation not available and 88% upland

*Deras farm: 193.901ac(77.560ha) relinquished to Revenue Deptt. for establishment of IT park

Reasons for under- utilisation :

1 Due to lack of adequate irrigation facilities

2 Due to lack of fencing

3 Low productivity due to improper land levelling resulted in poor water management

4 Industrial effect

5 High land
