Compilation of vital statistics and their use play very important role in good governance and policy making. The present publication "Orissa Agricultural Statistics, 2006-07" contains information on various aspects of agriculture in the state of Orissa, the important amongst them being, crop production, land utilization and input use. In addition to information available in the Directorate of Agriculture & Food Production, various useful facts and information have been drawn from the Directorate of Economics and Statistics, the Directorate of Horticulture and the Special Relief Commissioner, Orissa. Estimates of yield rate of all India and neighbouring states are also given for assessing the state's performance vis-à-vis other states. Crop loss due to natural calamities and relief measures taken have also been highlighted in the report. We've also accessed data from the internet from the websites of Food and Agriculture Organisation (FAO), Indian Council of Agricultural Research (ICAR), Department of Agriculture & Co-operation, Govt of India and few other credible organizations. The sincere endeavours of my colleagues in the Statistics Section, mainly, Shri N.K.Panda, Chief Statistician and Shri S.K.Das, Meteorological Inspector are highly appreciated. I thank the Agriculture Production Commissioner, Orissa and the Commissioner-cum-Secretary, Agriculture Department, Govt. of Orissa for their encouragement and guidance.

I am sure, this publication will be found useful by policy makers, researchers and all those interested in agricultural development of the state. Although sincere attempts have been made to ensure correctness of the data, any error found may have been unintentional and clerical. We would like to have suggestions for improvement of the publication in subsequent editions.

ORISSA AGRICULTURAL STATISTICS -2006-07

Introduction:

Agriculture is the mainstay of State economy & substance of life of the people. The State Orissa is an agrarian state with Agriculture & Animal Husbandry Sector contributing more than 23.43 % of Net State Domestic Product (NSDP) and providing employment, direct or indirect to 65% of its population. The share of Gross State Domestic Product (GSDP) from Agriculture during 2004-05 at constant price (1993-94) and at current price are 21.4% & 26.4% respectively. Hence, Agriculture plays a critical role in the economy of the state and the lively hood as majority of its populace. On the basis of topography, climate & Soil types, the state is divided in to 10 Agro climatic zones. The annual normal rainfall of the State is 1451.2 mms of which monsoon rainfall (June to Sept.) is 1144.3 mms, i.e. 79% of total rainfall. The Kharif paddy is the main crop of the State Orissa. Most of the paddy area cultivated under un-irrigated conditions during kharif season. Hence, the food grain production in Orissa, depends upon the production of paddy & subsequently this production depends upon weather & distribution of rainfall system during kharif season.

To obtain the maximum return of a farmer from the Agriculture, the Department of Agriculture, is always in search of new innovations, such as introduction of new varieties of HYV/Hybrid Varieties of seeds, increase in seed replacement ratio, increase in fertilizer consumption, increase in productivity of different crops etc., through different schemes implemented such as work plan (Rice Devt., Sugarcane Devt., Ragi Devt., & Farm Mechanisation), Cotton Devt. Programme, ISOPOM (Oilseed Devt., Puls Devt., Oil Palm & Maize Devt.) Jute Devt., Integrated Plant Protection Measure, Integrated Nutrient Management and Hort. Mission.

In order to assess the area & production of different crops, this Department of Agriculture forecasts four advance estimates and submit to different quarters basing on Crop Weather Situations through interaction with farmers and conducting crop cutting experiments at village /GP level.

This booklet on “**Orissa Agricultural Statistics 2006-07**” contains the estimates of area, yield rate and production of different crops and the land utilisation pattern for the year 2006-07. The estimates of paddy and potato given in this booklet are based on the sample surveys conducted under EARAS scheme by the Directorate of Economics and Statistics (DES) Orissa. The estimates for other crops are based on the reports received from the field staff of the Directorate of Agriculture and Food Production (DA & FP), Orissa & Director of Horticulture, Orissa. The DES, Orissa also frames estimates for 11 more crops under EARAS (Establishment of an Agency for Reporting Agricultural Statistics), which are at wide variance with those of the D.A & F.P, Orissa and hence are not adopted in this booklet. Besides this, ancillary information on other related items like rainfall, temperature humidity, irrigation, fertiliser consumption, seeds distribution, Farm Mechanisation and crop loan is also incorporated.

Rainfall situation

The pre-monsoon rainfall during April and May'2006 excess by 28% i.e 123.0mms as against the normal rainfall of 96.4mms .The monsoon rainfall i.e. from June to September was excess by 30 %. The post monsoon rainfall from October to December was deficient by 70%. The month wise rainfall position is indicated below.

Period	Normal (in mm)	Actual(in mm)	% Deviation
Summer & Pre monsoon (Jan.'06 to March'06)	59.8	28.0	- 53
Pre-Monsoon (April'06 – May' 06)	96.4	123.0	+ 28

Crop coverage :

The net area sown and gross cropped area during the year were **56.54** lakh hecets and **89.60** lakh hecets respectively. The cropping intensity was **158%**. The coverage under different crops during the year was as follows.

Crop	Area (in lakh hecets)						
	Kharif		Rabi		Annual	Total	
	Area	% total area	Area	% total area	Area	Area	% total area
Rice	41.36	67	3.14	13		44.50	50

Total	61.36	100	24.87	100	3.37	89.60	100

Rice is the dominant in Kharif season and pulses and oilseeds in Rabi season.

Irrigated area:-

The total irrigation potential created so far from all sources is about **40.40** lakh hecets. (**27.21** lakh hecets. during khariff and **13.19** lakh hect. during rabi). The gross irrigated area during the year is about **31.50** lakh hecets(**20.02** lakh hecets during Kharif & **11.48** lakh hecets during rabi). This is roughly **78%** of the potential created. The crop wise and season wise break-up is given below.

Paddy, Vegetables, Spices and Sugarcane are the main crops that received irrigation during the year.

High yielding coverage:

The coverage under high yield varieties of different crops is 37.21 lakh hec. The crop wise break up is given below.

(Area in lakh hec.)

Crop	Total Area	Area under High yielding	% of total
Paddy	44.50	35.45	80

Crop Production:

The area ,production and yield rates of the major grown crops in the state during the year are as follows.

A - Area in lakh hec
P - Production in lakh tones/ Lakh bales in case of fibres
Y - Yield rate in Kgs/ Hect

Crop	Kharif			Rabi			Total

During Kharif 2006 the rice production declined to **61.96** lakh tones as compared to 66 lakh tones during Kharif 2001. Non Paddy crops also suffered but to a lesser extent. The per hectare yield of Paddy (as estimated by DES, Orissa) is **22.36** qtls/hect as compared to **23.55** qtls/hect during Kharif 2001.

Input Management:-

Seed:

Supply of certified seeds during the year is **2.69** lakh qtls as against **2.32** lakh qtls in the previous year. The seed wise break up is given below.

Seed	Quantity supplied(in Qtls)		
	Kharif	Rabi	Total

Crop Insurance:

The Rashtriya Krishi Bima Yojana (RKBY) is in operation in the state since Rabi 1999. The crops covered are Paddy, Maize, Groundnut, Mustard, Nizer, Potato , Arhar ,

Cotton and Sugarcane. The defined area is block for paddy and Nizer district for Maize, Groundnut, Mustard, Potato, Sugarcane, Arhar and Cotton.

Calculation of Compensation:-

All the farmers covered under RKBY and growing the insured crop in the defined area will get compensation as per the following formula.

$$= \frac{\text{Short fall in yield}}{\text{Threshold (Guaranteed Yield)}} \times \text{Sum Insured}$$

- Short fall in yield = Threshold yield – Actual Yield
- Threshold Yield = Average of yield rates of last 3 consecutive years X Indemnity level of the crop (for Paddy)
- = Average of yield rates of last 5 consecutive years X indemnity level of the crop (for non-Paddy crops)
- Actual Yield = Yield rate of current year calculated on the basis crop cutting experiments conducted

The achievement made during the last few year is as follows.

Natural Calamities :

Orissa is one of the most disaster prone state of the country. The State experienced 3 bad years in succession, drought in 1998-99, Super Cyclone in 1999-00 and again drought in 2000. The State just recovered in 2001-02, but again had to face drought situation during 2002, during Kharif 2003, the State experienced severe flood in 23 districts and during 2004 again faced drought like situation (dry spell/ moisture stress condition) in 10 districts of the State. During 2005, 23 blocks of 6 districts of the State again faced drought like situation (dry spell/ moisture stress condition). During 3rd week of October 2005 there was a heavy rainfall in Balasore, Bhadrak, Cuttack, Jagatsingpur, Jajpur, Kendrapara,

Keonjhar, Angul, Mayurbhanj, Puri, Sambalpur, Baragarh districts which not only affected the Kharif Paddy but also affected the sowing of Rabi Groundnut & Pulses and subsequently affected its production.

During 2006 Kharif season again there was flood five times i.e. 30th June to 3rd July, 13th July to 15th July, 1st August to 4th August, 21st August to 23rd August, 29th August to 30th August in 26 district (except Sundargarh, Baragarh, Deogarh & Jharsuguda) of the State and about 2.88 lakh hecets of Paddy area was affected 50% & above. Again during October, 2006 the rainfall was deficient by 78% which caused reduction in yield of Paddy. Under the above conditions the Kharif Paddy production in the State declined to 92.47 Lakh MTs as compared to 99.57 Lakh MTs of Paddy of 2001, Kharif.

Similarly the Cotton Production reduced due to rainfall during boll brusting stage and Maize production in Nawarangpur district reduced due to heavy rainfall.

Notes :

1. For 2001, figures include estimated figures for those of the three sub-divisions viz. Mao Maram, Paomata and Purul of Senapati district of Manipur as census results of 2001 Census in these three sub-divisions were cancelled due to technical and administrative reasons.

2. The 1991 Census could not be held owing to disturbed conditions prevailing in Jammu & Kashmir. Hence the population figures for 1991 of Jammu & Kashmir have been worked out by 'interpolation'. The data on workers in columns 5-7 exclude J&K.

3. The 1981 census could not be held in Assam. The figures for 1981 for Assam have been worked out by interpolation. The data on workers in col. 5-7 exclude Assam.

4. Figures within parantheses in column 4 are percentages to the total population.

5. Figures within parantheses in columns 5 and 6 are percentages to column 7.

- The poverty line (implicit) at all-India level is worked out from the expenditure class-wise distribution of persons (based on Uniform Recall Period-consumption, i.e., consumption data collected from 30-day recall period for all items) and the poverty ratio at all-India level. The poverty ratio at all-India is obtained as the weighted average of the state-wise poverty ratio.
