PREFACE

The present publication of " Orissa Agricultural Statistics, 2004-05" contains information on various aspects of agriculture in the state, important among them being, crop production, land utilisation and input use. In addition to information available in the Directorate of Agriculture & Food Production, the information is drawn mainly from Directorate of Economics and Statistics, the Directorate of Horticulture and Board of Revenue, Orissa. Estimates of yield rate of all India and neighbouring states are also given for assessing the state's performance vis-a-vis the other states. Crop loss due to natural calamities and relief measures taken are also highlighted in the report.

I am sure that this publication will be found useful by those interested in agricultural development of the state. Suggestions to improve the publication would be highly appreciated.

Introduction:

This booklet on "Orissa Agricultural Statistics 2004-05" contains the estimates of area, yield rate and production of different crops and the land utilisation pattern for the year 2004-05. The estimates of paddy and potato given in this booklet are based on the sample surveys conducted under EARAS scheme by the Directorate of Economics and Statistics(DES) Orissa. The estimates for other crops are based on the reports received from the field staff of the Directorate of Agriculture and Food Production (DA & FP), Orissa & Director of Horticulture, Orissa. The DES, Orissa also frames estimates for 11 more crops under EARAS (Establishment of an Agency for Reporting Agricultural Statistics), which are at wide variance with those of the D.A & F.P, Orissa and hence are not adopted in this booklet. Besides this, ancillary information on other related items like rainfall, temperature humidity, irrigation, fertiliser consumption, seeds distribution, Farm Mechanisation and crop loan is also incorporated.

Rainfall situation

The pre-monsoon rainfall during April and May, 2004 was insufficient, i.e. 73.7mm and as against the normal rainfall of 106.1 mm. The monsoon rainfall i.e. from June to September was deficient by 11%. There was a good shower of rainfall during 1st week of October. The post monsoon rainfall from October to December was deficient by 8%. The rainfall position is indicated below.

Crop Insurance:

The Rashtriya Krishi Bima Yojana (RKBY) is in operation in the state since Rabi 1999. The crops covered are Paddy, Maize, Groundnut, Mustard, Nizer, Potato, Arhar, Cotton and Sugarcane. The defined area is block for paddy and Nizer and district for Maize, Groundnut, Mustard, Potato, Sugarcane, Arhar and Cotton.

Calculation of Compensation:-

All the farmers covered under RKBY and growing the insured crop in the defined area will get compensation as per the following formula.

$$\frac{\text{Short fall in yield}}{\text{Threshold}} \times \text{Sum Insured}$$

(Guaranteed Yield)

Short fall in Yield = Threshold yield – Actual Yield
 Threshold Yield = Average of yield rates of last 3 consecutive years X Indemnity level of the crop (for Paddy)
 = Average of yield rates of last 5 consecutive years X Indemnity level of the crop (for non-Paddy crops)
 Actual Yield = Yield rate of the current year calculated on the basis crop cutting experiments conducted

The achievement made since 1999-00 till date is as follows.

Natural Calamities :

Orissa is one of the most disaster prone states of the country. The State experienced 3 bad years in succession, drought in 1998, Super Cyclone in 1999 and again drought in 2000. The State just recovered in 2001, but again had to face drought situation during 2002 and during Kharif 2003, the State experienced severe flood in 23 districts. During 2004 again faced drought like situation (dry spell/ moisture stress condition) in 10 districts of the State. For which Kharif rice production declined to 58.84 lakh MTS as compared to 66 lakh MTS of 2001 Kharif. As there was a good shower of rainfall during the 1st week of October 2004 for which the Kharif rice crop saved.
