ORISSA AGRICULTURAL STATISTICS -2007-08

Introduction:

The word "Agriculture" comes from Latin words 'ager' meaning field and 'cultura' meaning to cultivate. So, it refers to the art of raising plant from the soil. Agriculture provides food grains, oilseeds, fiber, vegetables & spices, including raw materials for industry. In a way, it has not only served mankind for its sustenance but also forms the backbone of society's economy at large. In this backdrop, assessment of area, production and productivity of different crops is indeed essential. The database/ information built upon these statistics are immensely helpful in formulating plans and policies for the development of the sector in a more objective way besides giving a clear picture as to where all our developmental efforts have lead us to.

This booklet "Orissa Agricultural Statistics 2007-08" contains, mainly, the estimates of area, productivity and production of different crops, land utilisation pattern, weather parameters and other agriculture development indicators for the year 2007-08. The estimates of Paddy and Potato, furnished in the booklet have been received from the Director Economics and Statistics, Orissa. The estimates of other crops incorporated are based on the reports aggregated from the field staff of the Directorate of Agriculture & Food Production (DA&FP), Orissa & Directorate of Horticulture, Orissa. The Directorate of Economics & Statistics also enumerates other crops like, Maize, Ragi, Wheat, Mung, Biri, Horse gram, Groundnut, Til, Mustard & Sugarcane, which are at wide variation with those of the DA&FP (O). So, these are not adopted in this booklet. The other useful information relating to agriculture like rainfall, temperature, humidity, irrigation, fertilizer, seed, farm mechanization, crop loan & reports of line departments have also been published in this issue.

Agriculture in Orissa

Agriculture in a State like Orissa is multifaceted and of paramount importance with regard to its prevalence. It is also the mainstay of the State's economy and substance of life of the people. The State Orissa is predominantly agrarian with Agriculture and Animal Husbandry Sector

contributing 23.72% to the Net State Domestic Product (NSDP) (in the year 2004-05 at 1999-2000 prices) and providing employment directly or indirectly, to 65% of the total work force (as per 2001 Census). The share of Gross State Domestic Product (GSDP) from Agriculture and Animal Husbandry during 2004-05 at constant price (1999-2000) is 22.18%. Evidently, Agriculture in our state plays a vital role in the economy of the State and the livelihood of majority of its populace.

The State of Orissa is situated within **17° 31' to 20° 31' N latitude** and **81° 31' E to 87° 30' E longitude**. It has a geographical area of 155.71 (lakh ha) and a population of 3.68 crores as per the 2001 census. Area-wise, Orissa occupies 9th position in India. The total cultivated area of the State is 61.80 lakh ha. (40% of the geographical area) out of which 29.14 (lakh ha. is High land (47%), 17.55 lakh ha Medium land (28 %) and 15.11 lakh ha (25%) is low land. Out of the cultivated area about 33% is irrigated and rest 67% is rainfed exposed to the vagaries of the monsoon. So the production of agricultural crops in the state much depends on a good monsoon. The source wise irrigation potential created so far up to 2007-08 is tabled below.

(Area in lakh ha.)

2.	Minor Irrigation Projects	5.29	0.72
3.	Lift Irrigation Projects	4.43	2.34
4.	Other Sources	5.33	4.61
	Total	27.66	13.30

Climate & Rainfall

The State has a tropical climate, characterized by high temperature, high humidity, medium to high rainfall and short & mild winter.

Due to the blowing of South-West monsoon there is occurrence of rainfall in Orissa and the average annual rainfall is 1451.2 mm (1901-90). The peak period of rainy season is 15th June to September. The State

Orissa is differentiated into two broad regions. First is the Plateau region and the other one is the Coastal region. The plateau region comprises 77% of total geographical area of the State. This region is drought prone and differentiated into seven agro climatic zones. The coastal region comprises of 23% of the total geographical area of the State. This region is differentiated into three agro-climatic zones. The coastal alluvial soil within 10 kms from the sea coast is saline. The low land of this region suffers from water logging and is flood prone.

In spite of aberrant weather conditions and limited resources the agriculture department is at war with the low productivity. So, different schemes are being implemented in our state such as National Food Security Mission (NFSM), Rashtriya Krishi Vikas Yojan (RKVY), Work Plan, Cotton Development Programme, Integrated schemes of Oilseeds, Pulses, Oilpalm & Maize, (ISOPOM), Jute Development, Integrated Pest Management, National Project on Management of Soil Health and Fertility, National Horticulture Mission etc to obtain maximum return from farm land.

Cropping Pattern

Kharif is the main cropping season in Orissa and rice is the principal crop during Kharif, which occupies 67% of the cultivated area. Where as, cropping during Rabi season is confined to irrigated areas and land with available residual moisture in the soil, which mostly depends on the occurrence of rainfall during the last part of September.

Other major crops grown are; Maize, Ragi, Pulses (Arhar, Mung, Biri) Oilseeds (Groundnut, Til, Mustard, Niger), Fibers (Jute, Cotton, Mesta & Sunhemp), Sugarcane, Vegetables , Spices and Fruit crops like Mango, Coconut and Cashew nut etc.

Period of Sowing / Harvesting:

Many of the social customs & festivals have strong relevance to different phases of cultivation in the state. Akshya trutiya, celebrated in April-May, marks the first seeding of Paddy during Kharif. Garbhana sankranti in October symbolizes the reproductive phase of long duration photosensitive varieties of Paddy. Similarly, Nuakhaee and Laxmi Pooja coincide with harvesting of upland and low land paddy respectively.

Generally, non-paddy crops are sown after the out break of monsoon i.e. in the month of June. The harvesting period of major crops are mentioned below.

BRIEF DESCRIPTION ON CROP CONDITION & CROP PROSPECTS DURING THE YEAR 2007-08.

During Kharif-07 the monsoon set in during 2nd week of June'07. The rainfall from June to Sept'07 was 1395.4 mm as against the normal rainfall of 1144.3 mm. During Kharif'07 the State experienced flood like situation three times. As a result, an area of 229368 ha suffered crop loss of 50% and above. The details of the rainfall recorded during the year are furnished below.

Sl. No.	Period	Normal	Actual	% of deviation
1	Summer & Pre- monsoon (Jan. to March)	59.8	42.3	(-) 29.3
2	Pre-monsoon (April & May)	96.4	80.7	(-) 16.3

Grand Total		1451.2	1591.4	(+) 9.7

The condition of Kharif & Rabi crop during 07-08 was by and large normal.

Coverage of crops and its production:

We know rainbow has seven colours. Likewise there are seven basic inputs, which lead to have a bumper harvest. They are seed, fertilizer, pesticides, irrigation, farm implement, credit and technology.

The pace of development in agriculture productivity primarily depends upon the modern crop husbandry. Therefore, Agriculture Department starting from the DA&FP (O) to extension worker at the grass root level i.e. VAW engage in transfer of technology from research lab to the farmers' field.

During 2007-08, there was a record production of food grains. This was due to the coordinated efforts of extension functionaries of Agriculture, other line departments and above all the cultivators of Orissa. The details of achievement on area, yield and production of major crops are as follows.

Coverage of crops and its production:

Fertiliser:

Another factor which substantially improves the productivity of the crops is the use of chemical fertilizers. Due importance is being given on use of balanced fertilizer in line with the Integrated Nutrient Management principles which not only enhances production but also maintains the productivity of the soil. The details of fertilizer consumption made during 2007-08 are given below.

Type of fertilize	Consumption in `000 MT

Pesticides:

High yielding varieties of crops are susceptible to a large numbers of pests & diseases. So, need based plant protection measures are essential for sustaining agriculture production. Due thrust is being given in all the programmes on Integrated Pest Management in order to have effective pest control inflicting minimum damage to the environment. The details of pesticides consumption during 2007-08 is as follows.

(Pesticides in terms of a.i. in MT)

Farm Mechanisation:

The farm mechanization has got a highly positive relationship with productivity. The use of farm machineries is gaining popularity in our State. The achievement during 2007-08 made in this regard is presented herewith.

Item	Units	Achievement	
		Physical (Nos)	Financial (Rs.in lakh)

Total			1439.99

Creation of Captive Irrigation:

Assured supply of water is one of the pre-requisites for successful crop production. Accordingly, our State Govt. provides subsidy to the cultivators for creation of captive irrigation under RIDF (Jalanidhi). The details of achievement during 2007-08 are as follows.

Shallow Tube well	7460 Nos.
Bore Well	1260 Nos.
Surface lift	11 Nos
Dug well	357 Nos
<u>Total</u>	<u>9088 Nos.</u>

Crop loan:

Crop loan is an indispensable input, especially for the small and marginal cultivators of our state to meet the rising cost of inputs for modern crop husbandry. During the year 2007-08 an amount of Rs.2665.84 crores has been financed under crop loan as against the achievement of Rs.2494.00 crores during the corresponding period of last year. The details of crop loan disbursed are furnished below.

(Rs. in crores)

Year	Kharif	Rabi	Total
2007-08	1706.14	959.70	2665.84

Crop Insurance:

More than 67% of the crops grown in the State being rainfed are exposed to several uncertainties imposed by the vagaries of nature; flood, drought, cyclone, hail storm either alone or in combination including pest menace especially during Kharif. Thus, it has been Govt. endeavor to bring the vulnerable cultivator under the umbrella of crop insurance, so that they overcome the uncertainties posed by these natural calamities.

The **Rashtriya Krishi Bima Yojana** has been operational in our state from Rabi 1999-2000. The main objective of this scheme to protect the loanee and non-loanee farmers against the loss suffered by them due to crop failure on account of natural calamities such as drought, flood, hailstorm, pest/diseases etc. The crops covered are Paddy, Maize, Groundnut, Mustard, Niger, Potato, Arhar, Cotton. The defined area is block for Paddy, Niger and district for other crops.

Calculation of Compensation:

All the farmers covered under RKBY and growing the insured crop in the defined area will get compensation as per the following formula.

$$\text{Amount of Compensation} = \frac{\text{Short fall in yield}}{\text{Threshold (Guaranteed Yield)}} \times \text{Sum Insured}$$

Short fall in yield = Threshold yield - Actual Yield

Threshold Yield = Average of yield rates of last 3 consecutive years
X Indemnity level of the crop (for Paddy)

= Average of yield rates of last 5 consecutive years
X indemnity level of the crop (for non-Paddy crops)

Actual Yield = Yield rate of current year calculated on the basis
of crop cutting experiments conducted

The achievement made is given below.

	Kharif	Rabi	Total
Farmers Covered (Nos)	840727	132418	973145

Minimum Support Price & Procurement of Paddy:

The Minimum Support Price (MSP) is declared by the Govt. of India with the object to:-

- Prevent fall in price in the situation of over production.
- To protect the interest of farmers by ensuring them a minimum price for their produce in the situation of a price fall in the market.

During the year 2007-08, Govt. of Orissa have procured 24.10 lakh tonnes of rice as against the achievement of 19.91 lakh tones during the corresponding period of last year. The minimum support price (MSP), procurement and production of rice from 1995-96 to 2008-09 is given below.

Notes :

1. For 2001, figures include estimated figures for those of the three sub-divisions viz. Mao Maram, Paomata and Purul of Senapati district of Manipur as census results of 2001 Census in these three sub-divisions were cancelled due to technical and administrative reasons.

2. The 1991 Census could not be held owing to disturbed conditions prevailing in Jammu & Kashmir. Hence the population figures for 1991 of Jammu & Kashmir have been worked out by 'interpolation'. The data on workers in columns 5-7 exclude J&K.

3. The 1981 census could not be held in Assam. The figures for 1981 for Assam have been worked out by interpolation. The data on workers in col. 5-7 exclude Assam.

4. Figures within parantheses in column 4 are percentages to the total population.

5. Figures within parantheses in columns 5 and 6 are percentages to column 7.
