Forwarding note

The fully revised estimates of Area, Production and Yield per hectare of different crops in Orissa are released every year by the Statistics section of the Directorate of Agriculture and Food Production on the basis of the reports received from the District Agricultural Officers. The estimates of area and production of Autumn Rice and Winter Rice formulated by the State Bureau of Statistics and Economics are however being accepted and incorporated in the consolidated report from the year 1959-60.

The State Government have taken a decision recently, that the estimates of area and production of Summer Rice also as formulated by the Bureau of Statistics and Economics from 1963-64 onwards should be accepted as final. Consequently, the estimates of area and production of Summer Rice for the years 1963-64, to 1970-71 already released by this Directorate need be revised. A statement indicating the estimates already released by this Directorate and the estimates formulated by the Bureau of Statistics and Economics on the area, production and yield per hectare of Summer Rice from 1963-64 to 1970-71 is furnished below.
